HOSE TESTER

The Reliable Fire Products fire hose tester is suitable for fire departments as well as industry to perform acceptance and yearly tests on modern fire hose. The design provides for ease of use as well as functionality. Limited pump volume results in a less violent reaction should a hose burst. Four discharges means the operator can limit each hose lay to 300 feet, per NFPA, and still test 1200' of hose at a time.

Four (4), 2-1/2" NH Valved Discharges	Lawn Mower Style Wheels (No Light-Duty Casters)
Brass Valves with Stainless Steel Balls and Teflon Seats	GFCI Plug, NEMA 15
Four (4), 2-1/2" Female NH x 1-1/2" Male NH Adapters	110 Volt, 60 Hz, 10 Amperes
Four (4), 1-1/2" NH Bleeder Caps	Motor:
1-1/2" Female NH Swivel Inlet	1 Horsepower
Pump:	Totally Enclosed Fan-Cooled Type
Cast Iron Pump Housing	NEMA 56H Frame
Twin Piston, Positive Displacement	1725 RPM
3 Gallons Per Minute	Capacitor Start
500 PSI Rated	Continuous Duty Rated
1/2" Inlet and Outlet	1/2" Drain Valve
Low Speed (1800 RPM) for Less Noise	Check Valve in Pump Suction Line
2-Wheeler Style Chassis	35" High x 28" Wide x 25" Deep
